ABOUT US

Maverick Technical Solutions was established in 2022, born of the idea that we could deliver excellent customer service to the access control and electronic security industry. We believe that we can help our customers to get the most out of their systems, and we can provide additional value and functionality to existing products, as well as act in an advisory role for users who want to maximise the stability and reliability of their systems. Collectively, we have over 30 years' experience in the access control industry. We want to be different, go against the norm, be mavericks in how we approach customer service and technical assistance to our customers.
